

# Event Study: Ukraine Invasion Impact on Charitable Crowdfunding

DID Treatment Effect (Window: -15 to +15 months, excluding t=-3)

Reference period =  $t = -6$ . Error bars show 95% CI (HC1 robust SE).  
Positive values: Ukraine projects receive MORE funding than Non-Ukraine.  
 $t = -3$  excluded (anticipatory effects). At invasion:  $+2.43^{***}$  (11.3x more funding).
